

# Resume Recommendation System

- **Problem statement:**

- Build a system to Recommend Resume based on the job description provided by the recruiter.

- **Data Description:**

In this project we would like to work on text data which is Resumes. So, our goal will be building a system to recommend Resume based on the job description provided by the recruiter by deep learning models.

- **Data size:**

- **No. of Resume:** 1000

- **Tools:**

- Programs: Python Jupyter Notebook
- Libraries: panda, Matplotlib
- Algorithms: RNN, Keras
- Plots: bar plot, cat plot, pie chart

- **MVP Goal:**

The goal of this project is to build a system to recommend resume based on the job description provided by the recruiter.
